Without a doubt we are living in a time of great change. The next ten years are sure to be mind-blowing in their technological advancement and cultural decline. According to the 12 authors of I PREDICT! our generation is seeing a convergence of social, political, militaristic, and economic trends which the Bible foretold long ago. This book is comprised of 12 chapters written by twelve respected authors, each providing a summary of his or her unique perspective on how events and trends of our generation are precursors to the end of this age and the return of Christ. I should make clear this is not a book about dating the return of Christ or the rapture but rather an overview of events and social trends with an eye to increasing awareness of the day and age in which we live. After reading the book it is clear that not all of the authors agree on every point of Bible prophecy. Personally I enjoyed reading the different points of view that were offered. Each chapter gives the reader enough information to challenge them to run down the facts for themselves. To be sure with the differing opinions you'll likely find something to disagree with in this book. I know I did. But for those willing to look past the disagreements you also be sure to find some great information which will really inspire you to dig deeper in the various subject covered. My two favorite chapters of the book were: Dr. Gordon McDonald's, The Age of Convergence and Sharon Gilbert's, The Hybrid Age Begins. If you read nothing else in this book Dr. McDonald's chapter was worth the price of the entire book. An exceptional rendering of current trends and how they relate to Bible prophecy. Really well written and insightful.
