The Albertosaurus Mystery: Philip Currie's Hunt In The Badlands (Fossil Hunters)

Synopsis

In *The Tiny Titanosaurs*, young readers journey to Argentina with paleontologist Luis Chiappe as he makes a major discovery. Amidst a nesting ground filled with thousands of dinosaur eggs, Luis and his team were the first to find both skin and bones from unhatched baby dinosaurs. If the babies had survived, they would have grown to be some of the largest animals that ever walked the earth. What disaster kept the eggs from hatching? Discover the answer with Luis and his team. Full-color photographs, a map, and an exciting narrative text will inspire the budding fossil hunter in every child.

Customer Reviews

Mrs. Burling's reading class really enjoyed this book. Some of us more than others. We enjoyed that this book was a mystery at the end, there is still more to learn. It made many of us want to learn more about dinosaurs. We also liked that this book gave us lots of new information!
